

Organization Development Series 2011-2012

Eden II strives to make the organization a better place to work. It is our hope to improve group dynamics, organizational structure, and the culture within our agency. Organizational development is the practice of creating systematic changes in attitudes and beliefs to employees through training programs. To this end the training department has added a newly formed series which will assess current issues and provide suitable outcomes. These trainings will enable employees, at all levels, to develop skills and competences to continue to be successful in their career paths.

Supervisors should register employees with Shari Schatzman at least one week prior to attending the scheduled presentation. Each presentation will be held from *10:00-12:00 p.m. at the Wright Avenue conference room.*

Remember that each presentation is worth 2.0 continuing education hours.
